

# **MAJORITY RULES!**

## **(DEMOCRATIC HOMOSAPIEN SOCIETY)**

**(Tribute to the anonymous discoverer of fire, inventor of wheel,  
Socrates, Plato, Archimedes, Bruno, Galileo, da Vinci et al. \*)**

Intelligent homosapiens (negligible few) think to (re)search.

Inquisitive Scientists discover NATURE's laws,

Just for the fun and joy of finding.

Imaginative Technologists invent the laws' applications

To make the future comfortably challenging.

When infinite NATURE is compared to their intelligence,

Both are consciously respecting.

Parasite homosapiens (majority rest) live,

However, generally do not let others peacefully live.

Neurologically handicapped to evaluate the intelligence,

They use majority rule to devalue it through something called Economics.

Touts (Resource Managers) exploit the technologies.

Traders cheat to get and sell, to earn and store economic power.

Astrologers abuse Astronomy, to predict (in)secure future.

Religious magicians learn to show miracles and abuse stupid human fear.

Kings rob and tax to donate for domination over human power.

Politicians simply get to distribute, to remain popular.

Their stooges call it Social Service to distribute to other

After snatching from the researcher.

Intellectually incapable to understand that these pseudo powers,

Are incomparable to that of NATURE.

Engineers & Medical practitioners engineer the technological finding,

Dancing in the tune of the touts' order to secure their own living.

Some others claim to develop something called Culture,

Which is local, both spatially and temporally.

Though not necessarily following, but sufficiently

Exploiting the resources of NATURE.

Hence, always fight each other.

Biped idiots enjoy, dreaming it secure shelter,

Without paying respect to the intelligent endeavour.

Intellectually incapable to interpret themselves as slaves to the tout vulture.

Rationale perceives these all to be pseudo secure.

When NATURE unpredictably behaves,  
The pseudo security boomerangs.  
Intelligent gracefully acknowledge NATURE's vastness  
And put their effort to rectify themselves to rediscover its laws,  
Along with their newer applications.

Nevertheless, all parasites get scared due to their ignorance of NATURE,  
Though blame the intelligent,

“Why can't the `理性的\$' provide us the gadgets?

After all, we, the majority, are the ones,  
Who consume to value their intelligence.”

They vote to their majority  
In the parasites' democracy  
And send intelligence to the gallows!

In the democratic society of touts & idiots  
Only popularity pays,  
Not the intelligence.  
Because Majority Rules!

Abir Bandyopadhyay

---

\*Both the fire & the wheel trivially differentiate homosapien from other stupid animals. Greek mythological character **Prometheus** allegedly stole fire from Zeus (King of gods) and was consequently punished with miseries, worse than death. (The author believes this anonymous person was the great scientist to discover the mechanism of controlled exothermic chemical combustion, and the inventor of the wheel as the first technologist.)

**Socrates** accepted hemlock for his 'Elenchus', unafraid of death. (See his [Apology](#))

**Plato**, though never convicted, preached 'Socratic Elenchus', and proposed a model society, named after him, to be ruled only by properly learned people, who have spent up to 35 years of their life to learn.

**Archimedes** was killed by an idiot Roman soldier, whom he rebuked for disturbing his drawings of circles, as the history goes.

**Leonardo da Vinci**, though popularly known as a painter, was a Military Architect by profession, and a scientist by passion, wrote his three diaries, full of revolutionary scientific ideas, in mirror image. Apparently, he feared for his life, if those fall in the hands of dumb religious leaders & rulers.

**Bruno** was burnt alive for promoting Copernican universe, taunting the fear of his prosecutors.

**Galileo** welcomed public humiliation & house arrest to propagate Copernican views, arguably afraid of death. (See his [Apology](#))

Enormous number of great names, though negligible in comparison to the rest reproducing bipeds, represent 'et al.'
