

Program Educational Objectives (PEOs) of Mechanical Engineering Dept.:

PEO 1

To provide graduates who will work in design and analysis of mechanical systems with strong foundation in the basic Sciences and mathematics, and will find out the real-time solutions related to Mechanical Engineering.

PEO 2

To provide graduates who will apply their mechanical engineering skills, exhibiting critical thinking and problem solving skills in professional engineering practices and/or tackle social, technical and business challenges.

PEO 3

To provide graduates who will excel in professional career by their ability to work and communicate effectively as a team member and/or leader to complete the task with minimal resources, meetings and deadlines.

PEO 4

Graduates will be able to adapt the rapidly changing technologies in the areas of mechanical engineering and scale new heights in their profession through lifelong learning.
